

## Healing Hand Huntington's Disease Walk

Dear Friend,

The battle against Huntington's Disease (HD) rages on! There are over 30,000 people in the United States currently diagnosed with HD and each of their siblings and children have a 50% chance of developing this Disease.

HD is a "family disease", not just because it is inherited, but because it profoundly affects the entire family emotionally, socially and financially. Currently, there is no effective treatment or cure for HD. This is why we are so passionate to find answers. We are fighting against time, in order to save our families.

I've found a great way to help - through the Huntington's Disease Society of America (HDSA) *Healing Hand HD Walk*. I'll be walking at Bluff Point State Park in Groton CT on May 12, 2007 to help raise funds for the care and cure of HD, and you can help too! Simply make a donation to HDSA and I'll do the rest.

With your support, I hope to raise \$\_\_\_\_\_ for the Huntington's Disease Society of America. Please take a stand with me against this devastating disease by making a flat donation of \$10, \$25, \$50 or whatever you can afford. Not only will you help me to achieve that goal, but you'll also be helping the HDSA to fund vital research, education, and services for all those affected by HD.

Just complete the information below and return the form to me with your donation. Walking for HD is approaching fast, so please send your contribution as soon as possible.

I look forward to your support. Together we can make a difference!

Sincerely,
